

AMDA'S PULL FOR POMPE

AMDA invites you to enjoy a day of family fun benefitting Acid Maltase Deficiency, also known as Pompe Disease. This event is designed for all ages and ability levels.

Saturday, April 5, 2014

National Shooting Complex
5931 Roft Rd., SATX, 78253

Schedule of Events:

8:00 a.m. – Registration Breakfast
8:45 a.m. – Safety Program Available
9:30 a.m. – Clay Shoot Start
Noon – Lunch & Refreshments
Door Prizes Awarded
1:00 p.m. – Shoot Prizes Awarded

Over \$3,000 in Door Prizes
Over \$3,000 in Shooting Prizes
Silent/Live Auction

*Shooting prizes based on Lewis Draw:

When all shooting has been completed, the scores are listed in numerical order, from the highest to the lowest. They are then divided into as many groups as there are classes. For example, if there were 30 Lewis Class entries and 5 classes, there would be 6 scores in each class. The highest score in each class would be the winner. It's the luck of the draw. This is a good bet for a beginning shooter, because a low score has a good chance of winning.

First Place 1st flight	\$500 value
First place 2nd Flight	\$300 value
First Place 3rd Flight	\$200 value

Second place 1st flight	\$400 value
Second place 2nd flight	\$250 value
Second place 3rd flight	\$150 value

Third place 1st flight	\$300 value
Third place 2nd flight	\$150 value
Third place 3rd flight	\$100 value

First Place Women's Division	\$400 value
Second Place Women's Division	\$200 value
Third Place Women's Division	\$100 value

First Place 17 and Under	\$400 value
Second Place 17 and Under	\$200 value
Third Place 17 and Under	\$100 value

Benefitting...

The Acid Maltase Deficiency Association, formed to assist in funding research and to promote public awareness of Acid Maltase Deficiency, also known as Pompe Disease. Pompe disease is one of a family of 49 rare genetic disorders known as Lysosomal Storage Diseases or LSDs. Pompe disease is also known as Acid Maltase Deficiency or Glycogen Storage Disease type II. At one time, AMD was a death sentence, now, there are treatments coming on line but still no cure.

Raising funds for an organization like AMDA is difficult at best. The number of people impacted by this disease is relatively small (1 in 40,000) when compared to cancers and other respiratory illnesses such as asthma. It is when that small number includes one of your own, that it takes on new meaning.

Since the first "Pull for Pompe," in the spring of 2011, AMDA Research Grant has received and distributed \$383,533. All of the money raised, after most expenses, has been dedicated to funding the AMDA Research Grant.

The fourth annual AMDA Research Grant was awarded to Dr. Barbara Smith with the University of Florida for her Project: "[Diaphragmatic] Pacing in Subjects with Pompe Disease." Respiratory insufficiency is a serious, and often life-threatening effect of Pompe Disease, and Dr. Smith and her team's work will investigate a potential new groundbreaking area in managing patients with Pompe Disease. There are two primary aims for this research project, which will study patients with Pompe disease who have received a diaphragm pacemaker due to hypoventilation. The first aim is to measure the rate and extent that intramuscular diaphragm pacing replaces positive pressure ventilation. Second, we will determine whether patients who receive a diaphragm pacemaker report changes in their quality of life.
